 Megan Murphy, AHI
 Mary Randall, Glens Falls Hospital

MEETING OVERVIEW

Greg DeWitt provided background information related to the relationship between Iroquois Health Alliance and HealthStream and introduced representatives present.

Patrick O’Neil shared information related HealthStream and provided a brief demonstration. Key information:

- HealthStream focus is health care training only
- Some modules have been developed specifically related DSRIP initiatives
- HealthStream works with expert content providers to develop training
- Over 1800 training programs are currently available
- Can add training that is not provided by HealthStream (such as live training)
- Site is adaptable for mobile access
- Provides reporting capability necessary for DSRIP

- Ability to track training

It was noted that the program relates to training and tracking of training. Degrees and certifications are not provided through this site (alternate tracking mechanism will be needed related to education/certification).

HealthStream will be able to share demo site access to allow individuals to move through the site on their own to review. HealthStream will follow up with some questions. Kelly will be the contact for workgroup members to share any additional questions that may arise with representatives from HealthStream.

Next Meeting:

Kelly will forward a doodle poll to all workgroup members to determine next meeting time.
